

Sr. Release Engineer (m/f) - Cloud

Location **Berlin, Germany** *Type* **Full Time**

Overview

We are looking for Release Engineers with an intense passion for Deployment and Integration Automation. As a release engineer you will be responsible for implementing and managing cloud based continuous integration infrastructure to support global software development activities. Do you enjoy working with a pragmatic, result driven team? Do you have comprehensive experience in all aspects of the build and deployment process and know how to run virtual cloud infrastructure? Then we would love to hear more from you!

Responsibilities

- *Be part of our Release engineering team and make our development process faster, more streamlined and as automated as possible*
- *Build, manage, and continuously improve the build infrastructure for the dev teams including implementation of build scripts, continuous integration infrastructure and deployment tools*
- *Work closely with the Development, Architecture and QA teams to ensure that any applicable environment issues are resolved in advance of production implementation*
- *Investigate failures and coordinate failure analysis*
- *Facilitate resolution of issues prior to deployment and escalate issues where necessary*

Experience

- *Degree in Computer Science, or related work experience*
- *3+ years work experience in Release engineering processes*
- *Relevant release/configuration management knowledge and experience*
- *Solid working experience with source control and build tools (git, Jenkins a plus)*
- *Experience in setting and administering a Continuous Integration and delivery environment (Hudson/Jenkins/Cruise Control, Nexus/Artifactory)*
- *Experience using various development methodologies, including agile concepts*

Requirements

- *Very good knowledge of virtualization and build tools*
- *Understanding of methodologies such as test driven development, continuous integration*
- *Strong interpersonal abilities*
- *Solid analytical and effective problem solving skills*
- *Able to manage assigned tasks and projects with little supervision*
- *Perfect understanding of different branching and tagging strategies*
- *Very good English communication skills for working within an international team*

Compensation

- *work with highly motivated and engaged founders, and a supportive and pragmatic team*
- *Creative and professionally equipped work space with electric standing desks, large meeting spaces and much more*
- *State of the art work equipment such as Apple MacBook Pro, Cinema Display, iPhone and more*
- *opportunity to engage with promising start up early on and to work on cutting edge products used by millions of users worldwide*
